Pastor Grant Fishbook has faced the challenges of leading two churches through the moral failures of their primary leaders. Come and here the lessons learned in the real world of rebuilding and revitalizing a broken church.

**Advanced Christian Leadership Breakout**

**LEADING in Turbulent Times: The Practice of Adaptive Leadership**

*Adaptive challenges are difficult because their solutions require people to change their ways. Unlike known or routine problem solving for which past ways of thinking, relating, and operating are sufficient for achieving good outcomes, adaptive work demands three very tough human tasks: figuring out what to conserve from the past practices, figuring out what to discard from past practices, and inventing new ways that build from the best of the past. How do we move from merely surviving to thriving? How do we keep everything going while at the same time we change everything?*

This session focuses on the importance of a biblical model for developing thriving Christian leaders through the equipping and resourcing of local nationals.*
